

The Riko Group

The Riko group comprises companies and trademarks operating under a common business philosophy and a strong value system. The Riko group and its pillars were established by Janez Škrabec, a Slovene businessman, philanthropist and sponsor of art and culture.

Riko Group unites:

- [company Riko](#) and business partners that provide with their services and equipment technological solutions and industry, power engineering, environmental protection, logistics, civil engineering and construction;
- [company Riko Hise](#), which enhances the environmentally-sound and energy-saving living;
- trademark [Starck with Riko](#) with the line of prefabricated accessible technological homes – **P.A.T.H. by Starck with Riko**;
- [the Škrabec homestead](#), where Riko Group interlaces its philosophy of comprehensive practices with cultural events and business meetings.

Values of the Riko Group

- **Responsibility towards employees.** Riko enables its employees to develop themselves and play a creative role by supporting education, training and ambitions.
- **Responsibility towards partners.** The satisfaction of our customers and joint success in our projects that usually involve many participants is our highest goal to which all our efforts are directed.
- **Responsibility towards the environment.** We dedicate careful attention to the natural environment – in all areas of our activity. We continuously monitor and respect the applicable regulations and carefully select partners who are able to live up to our high standards.
- **Sustainable activity.** Contributing to economic progress while respecting the principles of ecology and social justice - this is our firm vision and everyday rule in the sustainable activity of Riko. Riko's philosophy is to actively participate in its environment, by developing business relations and supporting social, cultural and other sectors which are important for an integral development and fulfilled life in all respects.
- **Roots and wings.** Riko conducts its business worldwide, but remains firmly anchored in its original place. Our activity follows the wise saying "We need wings if we want to reach up high, but also roots so we do not lose the ground from beneath our feet". For this reason, we understand and shape our company with respect to the tradition which participated in forming our spirit, our values and our work.

Riko

Riko combines international experience in planning and executing projects in the areas of technological equipment, energy-power systems, environmental protection, logistics systems and civil construction with the highest standards of expertise and exact and careful consideration for our client's expectations.

Riko has extended our activity to new markets and areas where the need has arisen to provide integral solutions for modern, efficient and eco-friendly technologies in the production or processing industry.

Riko has acquired a good reputation and a solid position in the markets of the Russian federation, Belarus, Ukraine, Macedonia and the European Union. In our representative offices in Moscow, Minsk, Kiev, Skopje and London, we employ local experts who offer direct support to their customers.

Riko Hise

Riko Hise is a propulsive international company which manufactures and markets tailor-made ecological and energy-saving wooden buildings. The Riko system of wood construction has helped to realise numerous tailor-made private and residential projects and various public buildings, such as kindergartens, schools, wellness centres, commercial buildings, hotels, among others. Riko Hise complements its construction solutions by wooden facades, wooden ceilings and modular units.

- [Explore](#) Riko Hise's wooden prefabricated product and solutions.

Inspired by a century-long local tradition of wood crafting, the innovative living space solutions designed in Riko Hise are prefabricated in the production facilities in Ribnica using our own patent. Each Riko building is planned together with the owner and the architect, with a hands-on approach during the entire project, from the birth of the idea to the erection and finalisation of the building. In every project Riko participates with distinguished architects, always considering the needs and desires of our customers.

- [Find out more about](#) the qualities of Riko wooden building.

In the course of its activity, Riko Hise has become a setter of standards for ecological high-quality prefabricated timber buildings joining excellent business results with social responsibility.

By using wood as a renewable resource in construction, we emphasize the value of ecological materials, healthy living spaces and low-energy and environment-friendly living solutions.

→ [Get familiar](#) with our core values.

Riko Hise has developed a high quality system of tailor-made wooden construction which offers great flexibility and can thus be completely customized to the plans and ideas of the individual owners. Our commitment to tailor-made philosophy and the expertise in finding even the most challenging technical construction solutions has enabled us to carry out numerous prominent wooden prefabricated projects across Europe and made us a valuable partner to high profile European architects and architectural bureaus, i.e. [Philippe Starck](#), [Yoo Design Studio with Philippe Starck and Jade Jagger](#), [NBBJ Studio](#), [ZPZ Partners](#), [Steinmetz de Meyer](#), [Giancarlo Beltracci](#), [Paolo Giardello](#), [Spatio...](#)

→ [See more](#) of our referential tailor-made wooden buildings.

To date Riko Hise has developed into an internationally recognised and successful company, and the many Slovene and foreign certificates, as well as design and architecture awards are a testament to the quality of RIKO timber constructions.
